

SA AIA / ADVENTURE IN THE HEAT

Fire Safety at Outdoor Venues

Hot, dry weather and strong winds can support fast-spreading wildfire. Check local restrictions and keep the venue's evacuation arrangements ready.

01 Check before activities begin

Review official warnings, closures and local fire restrictions with the land manager or fire authority.

02 Prevent ignition

Use only permitted fire and cooking areas. Never leave a permitted fire unattended. Dispose of smoking materials safely.

03 Prepare to evacuate

Brief staff and visitors on alarm, assembly and exit arrangements. Plan for children and people needing assistance; keep emergency access clear.

04 Report and respond early

Report smoke or dangerous conditions to the local fire service or land manager. Follow official instructions and leave threatened areas early when directed.

Do not enter a fire area or attempt wildfire suppression without appropriate training.
